

**PRESS RELEASE, January 20<sup>th</sup> 2025**

## **Jekko is headed to Bauma 2025 with exciting innovations!**

Jekko is thrilled to announce its participation in **Bauma 2025**, the ultimate event for construction machinery enthusiasts, happening **April 7-13, 2025, in Munich, Germany**.

Visitors to the Jekko stand at **outdoor area FS, booth nr. 903/6**, will get an exclusive look at the latest in Lift&Handling technology, with major innovations involving all product families: minipickers, minicranes, articulated crawler cranes, and some more important news.

### **Brand-New Products**

Be among the first to discover the latest additions to Jekko's portfolio, showcasing the Company's unwavering commitment to research and development, which has solidified its position as a market leader in state-of-the-art lifting solutions for the most demanding construction and industrial tasks.

Visitors will explore cutting-edge technological updates and upgrades to our most popular models, delivering enhanced performance, efficiency, and usability. We will also introduce new accessories, offering greater flexibility for our cranes, alongside an expanded range of battery-powered models. Additionally, our innovative connectivity solutions will enable seamless integration and smarter operations through advanced telematics. To further push boundaries, we will unveil entirely new product families, broadening our offerings, addressing diverse industry needs, and setting new benchmarks in the lifting & handling sector.

### **Visionary Concepts: a taste of the future of construction**

Jekko will devote a dedicated space to showcase the innovative **MAXX – Mobile Assembly X-System** project that *Construction Robotics GmbH* of **RWTH Aachen University** has been working on for a long time in collaboration with Jekko, KUKA and Fundermax, major players in the construction and automation sector.

This groundbreaking initiative, a finalist for the *Bauma Innovation Award*, brings automation concepts into construction sites, aiming to improve efficiency and safety on jobsites. Dedicated live demonstrations of this project will be performed at the Jekko stand, offering visitors an up-close view of how automation can deeply transform the construction industry.

### **Connecting with Industry Leaders**

“Bauma 2025 provides the ideal platform for Jekko to connect with industry professionals, partners, and customers from around the world.” **Diego Tomasella**, Jekko CEO, said. “We are confident that we will present ourselves at our best, combining a vast array of groundbreaking product innovations with a visionary concept of how the future of the industry will evolve.”

We can't wait to meet you! Swing by our stand **nr 903/6 - FS outdoor area** to explore our latest innovations, watch live demonstrations, and chat with the Jekko team about how our solutions can support your projects. Let's shape the future of construction together!
